
FC506 Addressable Fire Control Panels

The FC506 easy-to-programme control panel has a 4-line, 40 character per line, LCD module display with a backlight, which provides written information regarding the system status, such as temperature, CO level, and smoke level, and is also used for programming the control panel. The front panel controls enable text and configuration changes.

The FC506 auto-addressing panel has 6 in 2 loops that can support up to 500 addressable devices and 256 zones. An IP board is available as an option for this panel.

Specifications

- The mechanical enclosure is made of sheet metal.
- The front door is plastic.
- H x W x D: 493mm x 429mm x 124mm

Features

Additional Panel Features

- Up to 800mA current dynamically shared across 3 circuits in each of the 2 loops
- Auto mapping with Intelli-Zone feature
- Online Help function
- USB interface dual role Host/Device
- Multi users and multi installers (Up to 2 installers, 8 users)
- Walk test function
- 4000 Event Log
- Loop break location
- On board PSTN communicator
- GSM/GPRS as external module
- Up to 8 repeaters and up to 7 FC500 series panel clients
- Event transmission through PSTN and IP
- Automatic drift compensation

Software Features

- Fast and simple system configuration, also offline
- Transferable user database
- Device graphic displayed
- Battery and wiring calculation
- Customizable cables database
- Visualization of all the devices assigned to a single zone
- Remote real time visualization of control panel loop and zone status, and so on.
- Easy Remote user interface with control buttons (reset, silence, evacuate)
- Multilevel map based on a tree structure
- Access device data from any pages of the map
- Configuration downloadable to USB memory stick
- Capability to print zone label sheet for front panel customization
